

Star Wars Species

Introduction

This document is produced as a GM and Player Aid for the Star Wars SAGA Roleplaying Game. It offers a visual aid to present Star Wars species, using the best image I could find, taken from various sources.

Philosophy

The first page consists of the species from the Core Rulebook, except Ewoks. The subsequent pages attempt to provide an image for every species presented in the 13 books produced for SAGA Edition and the online supplements produced by wizards.com. I have ignored the near-human species that clearly looks human. Many of the images are taken from "The New Essential Guide to Alien Species", published 2006 by Del Rey. Some are taken from the actual books. In the worst cases I have been forced to use photographs, screenshots from computergames or lineart.

Disclaimer

This document was not produced for profit. All the author of this document did was to do what any person could have done for personal use. What you do with this document is up to you. Feel free to print the document, fold it, cut it into cards, show it on a laptop, burn it or delete the file after posting an angry rant about how stupid the author is.

The font used in this document is StarVader.

Best Regards

JemyM
